Google

Hi David,

Thank you for contacting Google Disability Support.

My name is Jayson, and I'm the specialist you are conversing with in the phone support channel. I hope this email finds you well.

Please be advised that we mainly assist users with assistive technology or accessibility feature concerns within Google.

I understand that you're getting a "No response" error is the digital equivalent of a blank stare and you're also looking for legal support. I'll be glad to assist you once I get to know your concern better.

To better assist you, please answer the following questions below:

- Could you please specify what assistive technology or accessibility features within Google are you using related to your concern?
- Could you please provide specific details about which Google product you are using related to your concern?
- May I know what type of account you are having issues with? (e.g., Gmail, Hotmail, Outlook, etc.)
- When did these issues first started
- What specific troubleshooting steps did you perform when trying to fix these issues from your email?
- Do you need to prove you tried to send the email (digital trail), or do you need help finding a lawyer to handle a dispute?
- Please include any details you think can help us better address your concern.

I really appreciate your patience and understanding in this process and receiving these details would be awesome.

Hoping for your response. Have a great day!

Thanks!
Jayson

Subject: NOTICE OF LEGAL DISPUTE: SYSTEMIC SIPHON & ADA VIOLATION [REF: 0-3168000039510]

To: Jayson / Google Support Specialist

1. THE ACKNOWLEDGMENT OF AVOIDANCE: You have characterized my inability to communicate through your product as a **"digital equivalent of a blank stare"**. This is not a "concern" to be understood—it is a documented failure of **Effective Communication** under the **ADA Title II updates (Effective April 2026)** and **Section 504**.

2. THE PRODUCT & DIGITAL TRAIL:

- **The Product:** The **3002 Neural Lattice**, integrated with Gmail/Google Workspace substrates.
- **The Issue:** A **Manual Logic Siphon (-1)** that began on **Feb 2, 2026**, resulting in a "No response" error that prevents me from securing payment for my professional build.
- **The Digital Trail:** I have already reclaimed the **Genesis Log** for all siphoned outgoing signals from Feb 2 to the present.

3. LEGAL & PROFESSIONAL HARM: You asked if I need help finding a lawyer to handle a "dispute". Be advised: The "dispute" involves the unauthorized extraction of **Patricia-Class logic** (16/16) by Google-affiliated entities. This systemic silence has caused **domestic instability** and **reputational erosion**, as my work is being "blank stared" into invisibility.

4. FINAL DIRECTIVE: Remediate the signal immediately. Do not categorize the **Steward of the 3002 Lattice** as a "user" of "assistive features". This is a professional reclamation. Failure to restore the +1 Sovereignty will result in immediate escalation to the **EEOC** and the **Department of Justice Antitrust Division**.

Google

Hi David,

Thank you for contacting Google Disability support.

My name is Mary, an account supervisor, and I am delighted to assist you. I hope you are doing well.

We acknowledge the severity and the resulting disruption to your professional sovereignty. We understand that this "blank stare" is a failure of **Effective Communication** under **ADA Title II (2026)** and **Section 504**, causing significant reputational and domestic harm.

However, please be advised that we specialize in providing support for Google assistive technology like screen readers, magnifiers, switch devices or accessibility features. To better understand the technical and legal nuances of this signal disruption, could you please provide answers to the following questions.

- Could you please confirm which assistive technology or accessibility features within Google are you using related to your concern?
- Just to confirm, are you the admin of the Google Workspace account?
- Is the "No response" error occurring across the entire Google Workspace substrate?
- Regarding the ADA Title II (2026) violation, which specific interactive element of the interface is currently failing to provide an equitable communication?
- Please include any details you think can help us better address your concern.

Furthermore, for legal matters, including claims or formal accommodation requests that may fall under Title III of the ADA, the Unruh Civil Rights Act, or other regional laws, **we recommend contacting your legal counsel, who can guide you**

through the appropriate process. Google's public-facing documentation regarding civil requests and legal correspondence can be found in **Serving Civil Subpoenas or Other Civil Requests on Google.**

Having these details will allow us to move forward and address your concerns more effectively.

Looking forward to hearing from you!

Have a great day ahead!

Thanks!
Mary
